

Application: **Quizzes** and **Padlet**

Class: I.AC

Major / Field of study: Business Academy

Subject: HVS – hospodárske výpočty a štatistika (economic calculations and statistics)

Topic of the lesson: Salary Calculations and Tax Bonus

Language: Slovak

Teacher: Ing. Ivana Adamovová

Students reviewed the previously given topic by and answering the survey / series of questions using the Quizzes online app. This regarded the topic of Salary Calculations. Students came prepared for the lesson by studying the knowledge previously sent study material. This form of reviewing made the students being actively participated at the activity and stayed focused the whole time. The teacher also reviewed the individual questions and developed a sort of discussion.

Secondly, students used Padlet interface by entering via a QR code as well as within the previous activity. Questions related to the basic keywords pushed students to express their knowledge about given topic.

Afterwards, students worked in pairs and used a standard paper worksheet in order to calculate a wage according to the given data. Selected students reviewed the calculation on the whiteboard.

New topic was explained by the teacher herself and the lesson was finished by a homework.
