

Application: **Kahoot, Slido, Flippity, Padlet and Canva**

Class: IV.AC

Major / Field of study: Management of Regional Tourism

Subject: PVC – podnikanie vo viieckom cestovnom ruchu (Rural Business and Tourism)

Topic of the lesson: The Gemer Region

Language: Slovak

Teacher: Ing. Martina Kačeriaková

Before the new topic, students reviewed the last topic by practicing and answering the survey / series of questions. This regarded the topic of the Nitra Region. Students came prepared for the lesson by watching an explanative video before the lesson and learning the new topic. They used Slido in order to write their knowledge based on previous online learning (watching the video at home). It was a brainstorm method used in this part of the lesson. Next, Flippity app was used to sort the students into several groups to work together on a task. They used Padlet for analysing and writing the features of the Gemer Region. Every group of students aimed at certain characteristics of the tourism region, such as location, natural conditions, cultural monuments, etc. All the students were involved directly in this lesson by using their mobile phones and laptops to create the individual contributions into the Padlet form. Then they all reported their work for the others. The teacher presented interesting pictures relevant to the topic by using Canva presentation tool.
